Overview

As a federally designated Metropolitan Planning Organization (MPO), SCAG is required to adopt a Transportation Improvement Program (TIP) for the six-county region comprising Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties – also referred to as SCAG’s Federal Transportation Improvement Program (FTIP). The FTIP must include a financial plan that complies with federal financial constraint requirements. In non-attainment and maintenance areas, the financial plan must limit the programming of projects for the first two years of the FTIP to those for which funds are *available or committed* (23 CFR 450.324(e)). Revenues may be *reasonably available* in the third and fourth year of the FTIP to support programming levels for that year. In accordance with 23 U.S. Code Section 134(h) and 23 CFR Section 450.324(e), SCAG’s 2017 FTIP demonstrates financial constraint by identifying all transportation revenues including local, state, and federal sources available to meet the region’s programming totals.

The policy boards of the region’s county transportation commissions have approved their respective programs and committed necessary funds to implement the projects listed in the 2017 FTIP. SCAG has received final resolutions from each of the county transportation commissions certifying financial constraint (see Attachment B). Additionally, the 2017 FTIP is consistent with the adopted 2016-2040 RTP/SCS (April 7, 2016) as required by the California Government Code, Section 65080.

SCAG’s 2017 FTIP utilizes the 2016 State Transportation Improvement Program (STIP) Fund Estimate, adopted by the California Transportation Commission on August 27, 2015. Additionally, programming levels for the Regional Surface Transportation Program (RSTP) and the Congestion Mitigation Air Quality (CMAQ) program are based on estimated distribution of funds provided by the California Department of Transportation (Caltrans) to MPOs. In addition to state and federal funded projects, the 2017 FTIP includes local projects that are regionally significant and may require federal approval, regardless of funding source. Local funding sources associated with these projects are identified as well. Consistent with federal guidelines, the 2017 FTIP revenues and programming estimates are expressed in year-of-expenditure (or nominal) dollars.

Financial Capacity

2017 FTIP SOURCES AND USES OF FUNDS

The following financial capacity assessment for the 2017 FTIP shows that programming totals do not exceed projected revenues for the SCAG region. The 2017 FTIP demonstrates financial constraint by year, limiting programming of projects in the first two years to those for which funds are available or committed. Additionally, revenues are reasonably available in the third year of the 2017 FTIP, consistent with programmed levels for that year.

Local, state, and federal funding shares are presented in Figures 1 and 2. Total funds programmed for the SCAG region’s 2017 FTIP is \$27.7 billion. Local funds comprise 61 percent of total dollars programmed in the 2017 FTIP, state funds 18 percent and federal funds 21 percent. Uses of funds in the 2017 FTIP by modal category show that state highway projects total 42 percent of funds programmed, transit projects 36 percent, and local highway projects 22 percent.

Additional details on revenue sources and uses are presented in the tables located in Attachment D. There are a total of three tables in Attachment D, including a table showing revenue estimates for the first four years of the FTIP (FY2016/17 – FY2019/20); a corresponding table showing programmed totals; and a final table comparing revenue estimates to the programmed totals.

Financial Condition

The 2017 FTIP is consistent with the financial forecasting model developed by SCAG for the region's 2016–2040 Regional Transportation Plan/Sustainable Communities Strategy (2016 RTP/SCS)—the long-range transportation plan for the six-county SCAG region. The policies and investment strategies of SCAG's 2016 RTP/SCS set the framework for the 2017 FTIP. Further, the financial plan for the 2016 RTP/SCS provides a basis for identifying how much money is available to support the region's surface transportation investments.

The financial plan identifies all existing local, state, and federal transportation revenues that are committed, available, and reasonably available. The region has successfully secured the necessary resources to support transportation investments proposed in past planning cycles and this financial plan continues to incorporate recent milestones in realizing additional sources of funds for transportation investments.

The SCAG region relies heavily on local sales tax measures for the timely delivery of transportation projects. While most counties impose a 0.5 percent sales tax to fund transportation projects, Los Angeles County levies a 1.5 percent tax—a combination of two permanent half-cent sales taxes and Measure R at 0.5 percent. Measure R is not permanent and expires in 2039. Riverside County's Measure A also expires in 2039. Measure I in San Bernardino County expires in 2040, followed by Orange County's Measure M in 2041. Measure D in Imperial County expires in 2050. Ventura County is currently the only county in the region without a dedicated sales tax for transportation. However, Ventura County is in the process of seeking voter approval for a 0.5 percent sales tax.

In developing the region's financial plan, SCAG assessed the region's growth trends and economic outlook, stability of revenue streams, debt management policies, and commitments to maintaining and operating the region's transportation system. The following discussion highlights these critical areas.

GROWTH TRENDS

General economic as well as demographic trends and conditions directly impact transportation revenues in the SCAG region. The growth trends described in this section were integrated into SCAG's financial forecasting efforts.

Population and Employment Growth

The SCAG region is the second most populated metropolitan area in the United States. By July 1, 2015, the region's population had reached 18.9 million residents, a 4.2 percent increase (0.8 million more people) since 2010. Los Angeles County and Orange County account for 66.0 percent of the region's population growth over the last five years, adding 0.5 million residents, while Riverside and San Bernardino Counties together added 0.2 million residents. In terms of relative growth, Riverside and Imperial Counties were the fastest growing areas in the region. Riverside County grew by 6.2 percent and Imperial County grew by 5.7 percent. Los Angeles and Ventura

Counties were the slowest growing counties, in terms of percentage—only 3.6 and 3.4 percent increases, respectively, during the same period (between 2010 and 2015).

Despite lasting impacts from the economic recession that ended in 2009, the region's total employment was estimated to be 8.5 million in 2015, increasing by 0.8 million employed workers (9.8 percent) since 2010. The largest gains in employment between 2010 and 2015 were experienced in Los Angeles County (Los Angeles-Long Beach-Glendale MSA), which grew by 372,500 employed workers (8.7 percent). The Inland Empire (Riverside-San Bernardino-Ontario MSA) grew by 13.7 percent, adding 221,100 employed workers. Regional unemployment dropped down from 12.3 percent in 2010 to 6.4 percent in 2015. In 2015, regional unemployment ranged from a low of 4.5 percent in Orange County (Anaheim-Santa Ana-Irvine MSA) to a high of 24.0 percent in Imperial County (El Centro MSA).

Income

Income is one of the most important indicators of economic well-being in the region. In 2010, per capita income of the region was approximately \$40,311. By 2014, per capita income grew to \$46,411, an increase of 15.1 percent. After adjusting for inflation, regional per capita income increased from 2010 to 2014 by 7.3 percent. If the SCAG region was a state, it would rank as the 20th highest per capita income in both 2010 and 2014.

ECONOMIC OUTLOOK

Overall economic conditions play a large role in determining the level of revenues available for transportation. Although it is difficult to predict the future, especially given the recent economic turmoil, SCAG’s financial model takes a conservative approach in forecasting revenues. The approach includes maintaining historical growth trends for key revenue sources, including locally generated sales tax revenues as well as both state and federal gas tax revenues.

Inflation

The effect of inflation can be significant, causing both costs and revenues to be higher in nominal dollar terms. SCAG’s revenue model utilizes historical inflation trends as measured by the Gross Domestic Product (GDP) Price Deflator—an approach consistent with that used by the Federal Office of Management and Budget in preparing the Budget of the United States Government. Figure 3 shows inflation trends since World War II as measured by the GDP Price Deflator. Inflation has varied considerably over the long term, but has trended between 2 and 4 percent. On the basis of this information, a 2.4 percent inflation rate was used in the 2016 RTP/SCS financial plan to adjust constant dollar revenue forecasts into nominal (or year-of-expenditure) dollars.

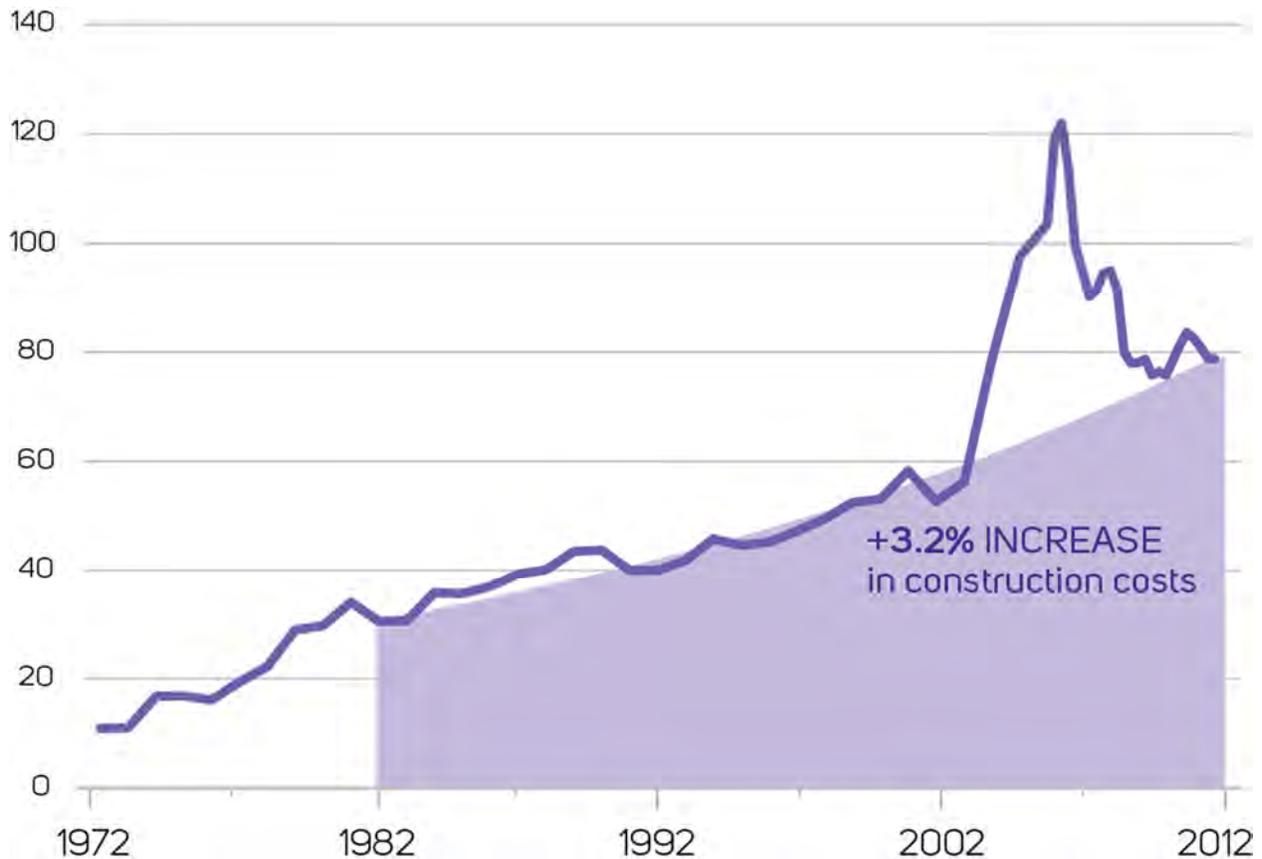

FIGURE 3 HISTORICAL INFLATION TRENDS

Construction Cost Increases

While inflation clearly affects the nominal dollars reported for future revenues, the rise in construction costs can further erode the purchasing power of transportation revenues. After spiking dramatically in 2007, construction costs have corrected in recent years. Figure 4 shows the increase and decline in California highway construction costs since the early 1970s. The United States Army Corps of Engineers Index for Roads, Railroads, and Bridges shows similar trends. While the recent correction in construction costs has slowed the longer-term increase in costs, the growth still remains above general inflation. The 2016 RTP/SCS financial plan uses a 3.2 percent annual inflation factor to estimate future, nominal costs. The faster increase in construction costs than in revenues contributes to a decline in purchasing power for transportation funding over the planning period.

Retail Sales Growth

Changes in personal consumption and the overall population are the main contributors to the growth in retail sales. Over the 30-year period from FY1982 to FY2012, statewide retail sales averaged an annual growth rate of 1.8 percent in real terms (when the effects of inflation are eliminated). The 2016 RTP/SCS financial plan assumes retail sales growth ranging from 1.8 percent to 3.9 percent annually in real terms.

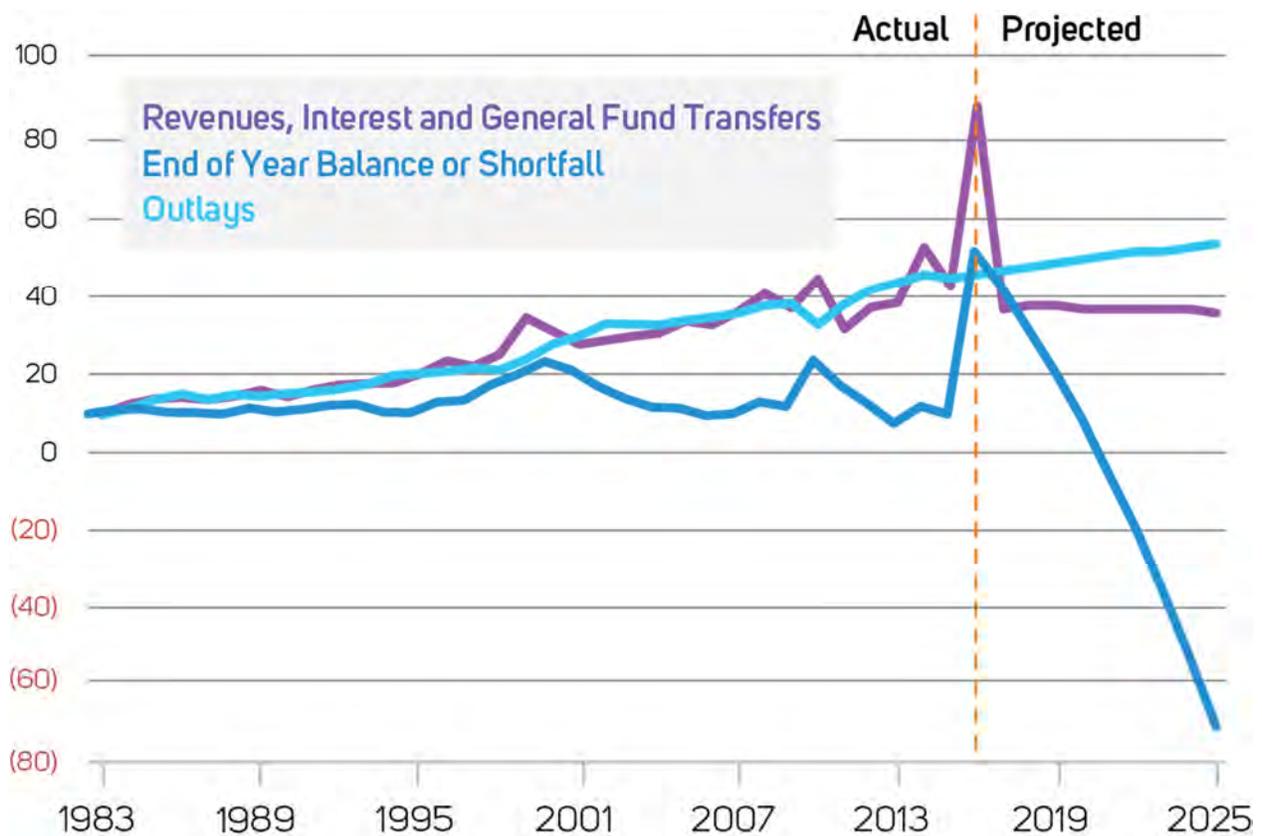

Status of the Federal Highway Trust Fund

The Federal Highway Trust Fund provides federal highway and transit funding from a nationally imposed 18.3-cent per gallon gasoline tax. Since 2008, the Trust Fund has failed to meet its obligations and has required the United States Congress to authorize \$141.1 billion in transfers from the General Fund to keep it solvent. The negative balances shown in Figure 5 illustrate the projected inability of the Trust Fund to pay its obligations into the highway account.

At the time of the 2016 RTP/SCS adoption, nearly a decade has passed without substantive Congressional agreement on a long-term solution to provide adequate funding for the Trust Fund.

The recently passed transportation reauthorization known as the FAST Act relies on \$70 billion of one-time, non-user fees to keep the Trust Fund solvent through 2020. It does not address the present, long-term structural deficiency that exists in funding the Trust Fund. Although the 2016 RTP/SCS financial plan assumes that Congress will reach agreement on reauthorizing federal spending for transportation programs over the plan horizon, the core revenues available from the Trust Fund are expected to decline due to increasing fuel efficiency and other factors.

Status of the State Highway Account

Despite the “Gas Tax Swap,” the effective state gas excise tax rate of 18 cents per gallon has remained unadjusted for more than 20 years. Gas tax revenues remain the only source of funding for the State Highway Operation and Protection Program (SHOPP), which funds projects to maintain the State Highway System. As shown in Figure 6, previous levels of funding have been considerably less than actual needs. Statewide, the 2015 Ten-Year SHOPP Plan identifies \$8.0 billion in statewide annual needs, while expenditures programmed for the next four years are only \$2.3 billion annually. Continued underinvestment in the maintenance needs of the State Highway System will only increase the cost of bringing our highway assets back to a state of good repair.

Operating and Maintaining the Region's Transportation System

A core component of the region's system management strategy is protecting our investment in the current transportation infrastructure. The region has invested billions of dollars in developing its multimodal transportation system and must protect these investments for current and future generations. In accordance with federal guidance on fiscal constraint, the SCAG region addresses system-level operation and maintenance needs in addition to estimating costs associated with capital expansion projects in both the RTP/SCS and the FTIP.

HIGHWAY AND REGIONAL ARTERIAL SYSTEM OPERATION AND MAINTENANCE (O&M) COSTS

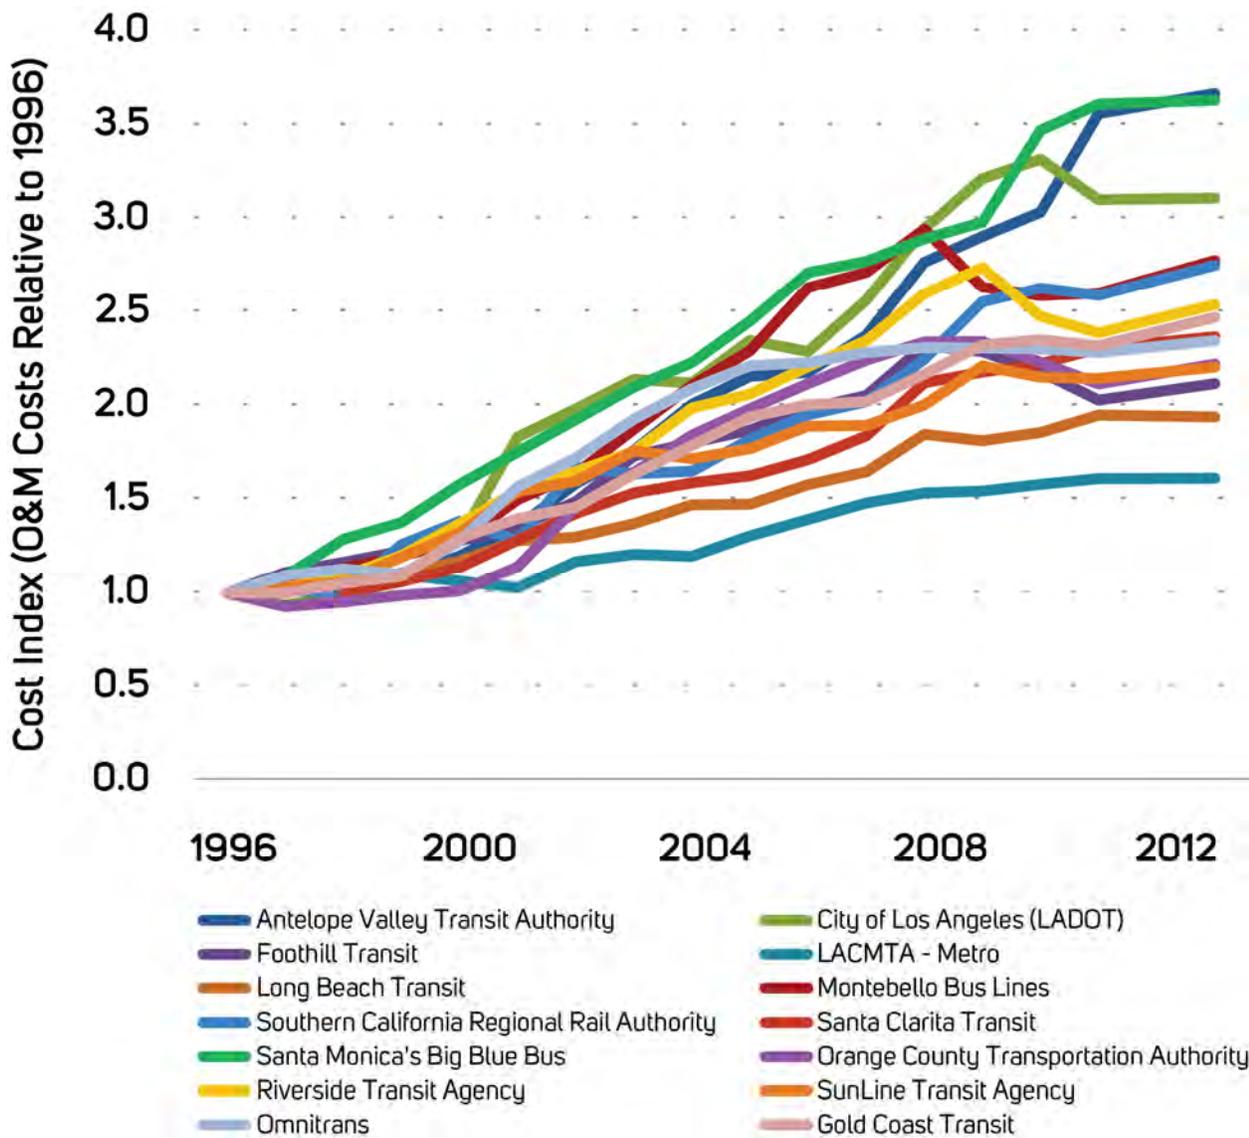

As a part of the region's commitment to preserving existing transportation assets, costs associated with operating and maintaining both the state highway and arterial systems are reflected in SCAG's financial forecasting model. SCAG's 2016 RTP/SCS identifies a total of \$103.0 billion in costs (through FY2040) to operate and maintain the region's state highway and arterial systems.

SCAG recognizes the importance of obtaining additional funding to achieve this level of investment. As such, SCAG continues to maintain the importance of adjusting the federal and state gas taxes and ultimately (post-2025) transitioning to a mileage-based user fee to maintain historical purchasing power.

TRANSIT O&M COSTS

Future transit O&M costs depend on a variety of factors, such as future revenue-miles of service, labor contracts, and age of rolling stock. Over the last decade, these O&M costs grew annually 1 to 10 percent in real terms, depending on the transit operator (see Figure 7).

FIGURE 7 GROWTH IN TRANSIT OPERATING AND MAINTENANCE COSTS

Source: SCAG Analysis of National Transit Database Statistics

In SCAG's 2016 RTP/SCS financial forecasting model, transit O&M costs are estimated based upon historical increases:

- The regional average increase (2.7 percent) is used for most operators.
- For Los Angeles County, the financial plan relies on detailed forecasts from the county transportation commission. These forecasts are consistent with historical data.

The 2016 RTP/SCS financial forecast identifies \$172.4 billion in transit and passenger rail O&M costs through FY2040.

Debt Management Policies

The local county transportation commissions in the SCAG region issue both short- and long-term debt on an as-needed basis. Primarily secured by local sales tax programs, long-term debt has been issued to fund a portion of the capital development costs of transportation systems throughout the region where doing so is cost-effective, fiscally prudent, and enhances the ability to facilitate project delivery. Short-term debt instruments have included commercial paper, tax and revenue as well as grant anticipation notes to provide interim cash for projects. In the SCAG region, general policies in the sale and management of debt have been to issue bonds subject to debt limitations; to maintain strong debt service coverage requirements; to obtain the highest possible credit ratings and the lowest cost of borrowing; as well as to minimize risk exposure. The latest outstanding debt for each local county transportation commission is summarized below:

- As of June 30, 2015, Imperial County Local Transportation Authority (ICLTA) had a total of \$48.2 million in long-term outstanding debt related to bonds secured by sales tax revenue.¹
- As of June 30, 2015, Los Angeles County Metropolitan Transportation Authority (LACMTA) had a total of \$4,023.8 million in long-term debt outstanding. Of this amount, \$3,037.5 million relates to bonds secured by sales tax revenue, \$142.0 million is secured by farebox and other general revenues and \$467.9 million relates to lease/leaseback obligations.²
- As of June 30, 2015, Orange County Transportation Authority (OCTA) had \$452.2 million in bonds and commercial paper notes outstanding compared to \$489.0 million as of June 30, 2014. The June 30, 2015 \$452.2 outstanding amount was comprised of \$332.7 million in sales tax revenue bonds and \$119.5 million in revenue refunding bonds.³
- As of June 30, 2015, Riverside County Transportation Commission (RCTC) had \$991.9 million in sales tax, toll revenue bonds and Transportation Infrastructure Finance and

Innovation Act (TIFIA) loan. The sales tax debt limitation for RCTC under the 2009 Measure A program is \$975.0 million, which exceeds the total outstanding debt of \$759.1 million. RCTC also authorized the issuance of toll revenue bonds not to exceed \$900.0 million, which is in excess of the total outstanding debt of \$183.9 million. The TIFIA loan, which is a toll revenue bond that is subordinate to the senior toll revenue bonds, provides federal funding up to \$421.1 million which may be drawn upon after certain conditions have been met.⁴

- As of June 30, 2015, San Bernardino Associated Governments (SANBAG) had \$200.1 million in sales tax revenue bonds outstanding. The voters of San Bernardino County approved Ordinance 04-02 in November 2004 which authorized debt not to exceed the total amount of the 2010–2040 Measure I sales tax.⁵

Conclusion

The financial conditions presented provide the overall context for the 2017 FTIP. Incorporating the analytical framework presented in this section to better gauge the region’s financial capacity, the Regional Funding and Expenditure Tables in Attachment D reflect a comprehensive investment package consistent with the region’s long-term transportation vision as delineated in the adopted 2016 RTP/SCS. Further, the 2017 FTIP for the SCAG region is financially constrained in accordance with 23 U.S. Code Section 134(h) and 23 CFR Section 450.324(e). All programming totals are consistent with projected revenues. The policy boards of the region’s county transportation commissions have approved their respective programs and committed funds to implement the projects listed in the 2017 FTIP. County resolutions are included in Attachment B to demonstrate financial commitment to these projects. Additional documentation is provided in the following supplementary attachment section.

Section 1. The Commission affirms its continuing commitment to the projects in the Federal Fiscal Years 2016/2017-2021/2022 San Bernardino County TIP.

Section 2. The Federal Fiscal Years 2016/2017-2021/2022 San Bernardino County TIP Financial Plan identifies the resources that are available and committed in the first two years and reasonably available to carry out the program in the last four years, and certifies that:

1. Projects in the Federal Fiscal Years 2016/2017-2021/2022 San Bernardino County TIP are consistent with the proposed 2016 State Transportation Improvement Program (STIP) scheduled to be approved by the California Transportation Commission in April 2016; and
2. All of the projects in the San Bernardino County TIP have complete funding identified in the Program. Except the following 5 projects which will require additional funding in the 2016 STIP cycle.
 - 20151301 – Redlands Passenger Rail Program
 - 20159901 – I-15 Express Lanes
 - 20159902 – I-10 Express Lanes
 - SBD31850 – I-215 @ Barton Road Interchange
 - SBD59303 – Set asides/reservations for future SB45-Planning, Programming and Monitoring

These projects are the County's priorities for 2016 STIP funds. The San Bernardino County 2016 STIP Regional Improvement Program, as identified in the Financial Plan, will include sufficient funds to complete the projects. Therefore, as required by Federal regulations, SANBAG finds that full funding can reasonably be anticipated to be available for these projects within the time period contemplated for completion of the project.

3. SANBAG has the funding capacity in its county Surface Transportation Program ("STP") and Congestion Mitigation and Air Quality Program ("CMAQ") apportionments to fund all of the projects programmed for those funds in the Federal Fiscal Years 2016/2017-2021/2022 San Bernardino County TIP; and
4. The local match for projects funded with federal STP and CMAQ program funds is identified in the San Bernardino County TIP; and
5. All of Federal Transit Administration-funded projects are programmed consistent with MAP-21 funding levels.
6. SANBAG staff is authorized to amend the TIP based on current funding levels and funding priorities established by the SANBAG Board of Directors and other project sponsors.

Section 3. This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED at a meeting of the San Bernardino County Transportation Commission held on February 3, 2016.

Expedited Project Selection Procedures

Expedited Project Selection Procedures

Under California law (AB 1246), the County Transportation Commissions (CTCs- Imperial County Transportation Commission, Los Angeles County Metropolitan Transportation Authority, Orange County Transportation Authority, San Bernardino Associated Governments, Riverside County Transportation Commission, and Ventura County Transportation Commission) are responsible for developing the county transportation improvement programs for submittal to SCAG. SCAG in turn prepares the FTIP using the county TIPs.

SCAG publishes the FTIP guidelines at the beginning of each FTIP cycle and outlines all federal, state, and MPO requirements to facilitate the development of the county TIPs.

SCAG analyzes all of the county TIP projects for consistency with the RTP and for financial constraint. SCAG incorporates the eligible projects into the Federal Transportation Improvement Program (FTIP) for conformity analysis. Projects that are not consistent with the federal and MPO requirements are not incorporated into the FTIP.

Should conflicts arise, they are worked out with the CTCs, SCAG's Regional Council and the AB 1246 CEOs Committee. If a project should fall out, then SCAG coordinates with the CTCs to replace it. The Transportation Conformity Working Group also serves as a mechanism for interagency consultation for TIP issues between staff representatives from SCAG, the CTCs, Caltrans, and federal and state agencies.

2. Project Programming

Once the CTCs have programmed funds to projects, as required by state and federal statutes, projects are then included in the FTIP in accordance with the estimated project delivery schedules. The first four years of the FTIP are required to be financially constrained, and programming beyond this period is for information purposes only. Below are the steps which specify how projects are programmed in the FTIP:

- i. The CTCs have established that projects programmed in the first four years are priority projects for the region and are programmed according to estimated project delivery schedules at the time of the TIP submittal. SCAG incorporates the county TIPs into the Federal TIP as submitted by the CTCs in accordance with the appropriate transportation conformity and RTP consistency requirements.
- ii. SCAG performs all required conformity and consistency analysis and public hearings on the FTIP and adopts the FTIP.
- iii. SCAG submits the FTIP to the Governor (authority delegated to Caltrans) for incorporation into the State's Federal TIP, and SCAG simultaneously submits the conformity findings to the FHWA, FTA, and EPA for approval of the final conformity determination.

3. Expedited Project Selection Procedures

The current Code of Federal Regulations, 23CFR450.330, states the following regarding Expedited Project Selection Procedures (EPSP):

“If the State or public transportation operator(s) wishes to proceed with a project in the second, third year, or fourth year of the TIP, the specific project selection procedures stated in paragraphs (b) and (c) of this section must be used unless the MPO, the State and the public transportation operator(s) jointly develop expedited project selection procedures to provide for the advancement of projects from the second, third or fourth year of the TIP.”

In order to address the above regulation the SCAG region (SCAG, County Transportation Commissions (CTCs), and transit operators) developed and agree to the following expedited project selection procedures:

Projects programmed within the first four years may be advanced to accommodate project schedules that have proceeded more rapidly than estimated. This advancement allows project sponsors the flexibility to deliver and obligate state and/or federal funds in a timely and efficient manner. Nevertheless, non-TCM projects can only advance ahead of TCM projects if they do not cause TCM projects to be delayed.

- i. SCAG receives request to use EPSP for project(s) in the FTIP.
- ii. SCAG analyzes, discusses with CTC, and takes action on the request for the use of EPSP for project(s) in the FTIP.

In addition, SCAG and Caltrans agree that the Caltrans’ State Highway Operation Protection Program (SHOPP) or Highway Maintenance (HM) Program Manager may advance or delay projects programmed in the adopted SHOPP or HM project schedule upon notifying SCAG.

The Caltrans Division of Local Assistance has implemented a project selection process for the Active Transportation Program (ATP), Highway Safety Improvement Program (HSIP), Highway-Railroad Grade Separation Program, the Highway Bridge Program (HBP), and High Risk Rural Roads (HRRR/HR3) Program to produce the four-year FTIP Program Schedule planning list. Projects funded through the programs listed may be advanced or delayed within the four-year element of the FTIP by the authorized Program Managers without amending the FTIP, upon notification to SCAG.

Projects from the first four years of the 2017 FTIP have been selected using the project selection procedures.
